My dear Mr Wharton

I saw Mr Biddle on Friday and we shall have a close scrutiny of the accounts at the Library — but I am so very busy just now and shall be so for a few weeks, that it is very uncertain when we can get at it. Then certainly seems that our money for book expenditure is greatly below what it ought to be — but I think you largely over-estimate our income — I cannot make it as much as $10.000 per ann — which you say $14.000 — However as soon as I possibly can, I will go into the matter thorough-

My dear Sir

I was to have met Mr Biddle at the Library this morning, but instead found a note from him to say that he was compelled to attend to some Board of Charities business which would prevent him from keeping his engagement, and asking me to act without him. As the result I enclose you a memorandum of the amounts spent annually for the past seven years for books and binding, by which you will see that third year we shall have more for these purposes than the average of the expenditure during that time. Mr Smith informs me that he has seen the booksellers and can obtain no discount for monthly pay-

ments, and as our balances draw
interest — a small one it is true —
it is better to make what we can
out of the money and pay the
bills semi-annually — But this
is in your province as book
Committee rather than in our ours.
As to the Building Fund, the
$3000 Mortgage is to be paid
for early in July, and that with
the balance on hand will carry
us well into the Autumn, so that we
need call none of our Governments
until then. Besides we have some
10-40 Bonds which have been called
and we shall be in funds from them.

Yours truly

H. J. Whalon Esq. John S. Elwood

P.S. Please return Smith's State-
ment as I want it for Mr Biddle.

S.E. for Dockyard Museum

24 June 1879

My dear Sir

Mr Biddle met me at the Library this morning and we went over matters there and are entirely satisfied. To offset the increase of the subscription, there has been a very considerable falling off in rentals, and an increase of taxation – there have been two boys employed at a cost together of £30 per annum – the insurance has been increased – the card catalogue has cost £1100 – Mr Barnwell has been paid for his work – legal expenses have been paid £850 – repairs have been quite heavy – salaries have been increased – and the only increase in incidental expenses not accounted for in full for the five years past is an average of £85 per annum.

For the next year we ought to have
